139. (Currently Amended) The self-service library terminal of claim 138 wherein the controller is arranged to control the display in order to remind the borrower to pay immediately for the overdue ~~article~~ book.

140. (Currently Amended) The self-service library terminal of claim 138 wherein the controller is arranged to allow the borrower to continue a present loan transaction even though the borrower has not paid for overdue ~~article~~ book.

141. (Currently Amended) The self-service library terminal of claim 138 wherein the controller is arranged to give the borrower the option of continuing a present loan transaction even though the borrower has not paid for an overdue ~~article~~ book or of paying immediately for the overdue ~~article~~ book.

142. (Original) The self-service library terminal of claim 132 further comprising a display, wherein the controller is arranged to control the display in order to remind the borrower of a hold reserved for the borrower.

143. (Original) The self-service library terminal of claim 132 further comprising a display, wherein the controller is arranged to control the display in order to remind the borrower of a fine owed by the borrower.

144. (Cancelled)

145. (Currently Amended) The self-service library terminal of claim ~~144~~ 132 wherein the ~~collection device is~~ payment apparatus comprises a credit card reader.

146. (Currently Amended) The self-service library terminal of claim ~~144~~ 132 wherein the ~~collection device is~~ payment apparatus comprises a debit card reader.

147. (Currently Amended) The self-service library terminal of claim ~~144~~ 132 wherein the ~~collection device is~~ payment apparatus comprises a smart card reader.

148. (Currently Amended) The self-service library terminal of claim ~~144~~ 132 wherein the ~~collection device is~~ payment apparatus comprises a cash receiver.

149. (Original) The self-service library terminal of claim 132 further comprising a connector, wherein the connector is arranged to couple the self-service library terminal over a link to a circulation system, and wherein the controller is arranged to store loan transactions during periods when the link to the circulation system is down so that the loan transactions can be later transferred to the circulation system.

150. (Original) The self-service library terminal of claim 132 further comprising a display, wherein the controller is arranged to control the display in order to remind the borrower of a new charge.

151. (Original) The self-service library terminal of claim 150 wherein the controller is arranged to control the display in order to remind the borrower that the borrower can accept or reject the new charge.

C1
152. (Currently Amended) The self-service library terminal of claim 132 further comprising an ~~article~~ a book receiving area, wherein the controller is arranged to control the reader so as to project a visible indicator onto the ~~article~~ book receiving area and so as to change the visible indicator between first and second visible states.

C2 sub 2
183. (Currently Amended) A self-service library terminal comprising:
a reader that reads identifications on ~~articles~~ books involved in library loan transactions;
a payment receiver that receives payments associated with the loan transactions; and,
a controller that processes the identifications read by the reader and the payments received by the payment receiver.

184. (Previously Added) The self-service library terminal of claim 183 wherein the payment receiver comprises a cash receiver.

185. (Previously Added) The self-service library terminal of claim 183 wherein the payment receiver comprises a credit card receiver.

186. (Previously Added) The self-service library terminal of claim 183 wherein the payment receiver comprises a debit card receiver.

187. (Previously Added) The self-service library terminal of claim 183 wherein the payment receiver comprises a smart card receiver.

188. (Previously Added) The self-service library terminal of claim 183 further comprising a display, wherein the controller controls the display in order to remind the borrower that a loan is a chargeable loan.

189. (Previously Added) The self-service library terminal of claim 188 wherein the controller controls the display in order to request that the borrower pay a fee for the chargeable loan.

190. (Currently Amended) The self-service library terminal of claim 188 wherein the controller controls the display in order to request that the

borrower pay a fee for the chargeable loan upon return of the ~~article~~ book.

191. (Currently Amended) The self-service library terminal of claim 183 further comprising a display, wherein the controller controls the display to remind the borrower of an overdue ~~article~~ book chargeable to the borrower.

192. (Currently Amended) The self-service library terminal of claim 191 wherein the controller controls the display to remind the borrower to pay immediately for the overdue ~~article~~ book.

193. (Currently Amended) The self-service library terminal of claim 191 wherein the controller allows the borrower to continue a present loan transaction even though the borrower has not paid for overdue ~~article~~ book.

194. (Previously Added) The self-service library terminal of claim 183 further comprising a display, wherein the controller controls the display to remind the borrower of a fine owed by the borrower.

195. (Previously Added) The self-service library terminal of claim 183 further comprising a connector, wherein the connector is arranged to couple the self-service library terminal over a link to a circulation system, and wherein the controller is arranged to store loan transactions during periods when the link to the circulation system is down so that the loan transactions can be later transferred to the circulation system.

196. (Currently Amended) The self-service library terminal of claim 183 further comprising an ~~article~~ a book receiving area, wherein the controller is arranged to control the reader so as to project a visible indicator onto the ~~article~~ book receiving area and so as to change the visible indicator between first and second visible states.

197. (Currently Amended) A method implemented by a self-service library terminal comprising:

reading an identification on an ~~article~~ a book involved in a library loan transaction;
reading a payment from a payment card;

*Unit

C2*

processing the identification to determine an
identification of the ~~article~~ book involved in the loan
transaction; and,

processing the payment in relation to the loan
transaction.

198. (Previously Added) The method of claim
197 wherein the reading of a payment from a payment card
comprises reading a payment from a credit card.

199. (Previously Added) The method of claim
197 wherein the reading of a payment from a payment card
comprises reading a payment from a debit card.

200. (Previously Added) The method of claim
197 wherein the reading of a payment from a payment card
comprises reading a payment from a smart card.

201. (Previously Added) The method of claim
197 further comprising displaying a reminder to a patron
that a loan is a chargeable loan.

202. (Previously Added) The method of claim
197 further comprising displaying a request that a patron
pay a fee associated with the loan transaction.

203. (Previously Added) The method of claim
197 displaying a request that a patron pay a fee for a
chargeable loan transaction.

204. (Previously Added) The method of claim
197 displaying a reminder to a patron that an overdue
fine is associated with the loan transaction.

205. (Previously Added) The method of claim
197 further comprising:
storing loan transactions during periods when a
link between the self-service library terminal and a
circulation system is down; and,
communicating the stored loan transactions to
the circulation system when the link is back up.

206. (Currently Amended) The method of claim
197 further comprising:
projecting a visible indicator onto ~~an article~~
a book receiving area; and,

changing the visible indicator between first
and second visible states.

207. (Previously Added) The self-service
library terminal of claim 182 wherein the payment
apparatus comprises a cash receiver.

208. (Previously Added) The self-service
library terminal of claim 182 wherein the payment
apparatus comprises a card reader.
